

About the Gifkins jig

COL HOSIE WOODTURNER PTY LTD
**GIFKINS
DOVETAIL**

THE JIG... Gifkins Dovetail manufactures the only Australian made jig for cutting through dovetail joints and finger joints. It is a beautifully designed tool that delivers precise joints every time. The jig is designed for use on a table mounted router.

Unlike most jigs-no special fittings are required for your router-it works brilliantly with most routers in any table [providing the table is flat]. You supply dressed [DAR], sanded and squared timber, two clamps-and you're ready to go!

No measuring! No fiddling! No fuss!

Choose from five templates across three timber thicknesses:

- **H10**, a small dovetail template that cuts a delicate dovetail joint, using timbers 2.0mm to 10.0mm thick.
- **A10**, a medium sized dovetail template, and **F5**, a medium sized finger joint template; both use timber from 5.0mm to 13.0mm thick.
- **B10**, a large dovetail template, and **F15**, a large finger joint template; both use timber from 14.0mm to 22.0mm thick.

JIG OPERATION...

How to cut a test joint: Prepare your timber to the required thickness. With the dovetail cutter secured in the router, line up the dovetail side. Slide the stops up to the sides of timber and secure [see the above example]. Cut the profile, taking care to clean out all the timber. Change to the straight router bit. Now turn the jig around. Leaving the stops in position—insert the panel for the pin side. Make your first pass gently across the face of the timber to introduce the cutter to the wider space. Continue to clean out the joint, inserting the router bit several times.

Pin spacing	18	20	38	10	30
Min thickness	2	5	14	5	14
Max thickness	10	13	22	13	22
Max width	290	310	310	310	310

THE STANDARD TEMPLATES...

H10 TEMPLATE

H10 dovetail template cuts a small dovetail suitable for small scale work, delicate boxes, tray inserts and trays.

It suits timber from 2.0mm to 10mm thick.

A10 TEMPLATE

A10 dovetail template cuts a medium sized dovetail and is our most popular and versatile template.

Use thinner timber for delicate boxes and fine insert trays, through to thicker timbers for box carcasses, drawers, file trays, larger boxes and small joinery.

Timber range: 5.0mm to 13mm.

B10 TEMPLATE

B10 dovetail template profile produces a large dovetail joint which suits large scale projects. For example large drawers, blanket boxes and small furniture items.

Timber range: 14mm to 22mm.

F5 TEMPLATE

F5 finger joint template produces a decorative 5.0mm finger joint for small to medium pieces. It adds versatility to look of boxes and insert trays. The template can also be used to make small wooden hinges.

Timber range: 5.0mm to 13mm.

F15 TEMPLATE

F15 finger joint template produces a 15mm decorative joint for larger pieces of work such as trays, blanket boxes, hive boxes and furniture-sized pieces.

It is yet another profile to add to the versatility of the Gifkins Dovetail jig.

F15 suits timber thicknesses from 13mm to 22mm.

THE STANDARD PACKAGES...

BOX MAKER'S STARTER PACK **\$599** [Discounted price]

Want to make boxes but don't where to start? The starter pack has everything the enthusiast needs to cut perfect joints and go on to make beautiful boxes. The pack contains:

[1] A Standard Solo jig package with **one** template of your choice; [2] the Ultimate box maker's cutter kit [with five box cutters], [3] one Bessey Kliklamp, [4] a pair of clamp holders, and [5] a demonstration DVD.

For full details on all packages see *SHOP—Standard packages*.

STANDARD THE LOT PACKAGE **\$1185** [Discounted price]

The jig with all **five** templates plus cutters to suit. What a great value deal this package is! For the woodworker that wants all the options, it includes five templates—three for dovetailing and two for finger joints.

The Lot package includes two Bessey Kliklamps, a pair of clamp holders, demonstration DVDs for dovetailing and finger jointing, and the variable joint spacers [VJS].

STANDARD PREMIUM PACKAGE **\$855** [Discounted price]

A jig with **four** templates plus cutters to suit. This package offers excellent value to the woodworker wanting to expand their horizons. It includes four of our five template profiles.

The recommended choice is the H10, A10, B10 and F5 templates. Consider purchasing the Gifkins box makers' router table. It is specially designed to use with the Dovetail jig and *Triton* router.

STANDARD MASTERS PACKAGE **\$680** [Discounted price]

A jig with **three** templates plus cutters to suit. This package is recommended for the more serious woodworker, offering increased options.

For dovetailing only, choose the A10, B10 and H10 templates. For small work only, choose the A10, H10 and F5 templates. Consider adding an Ultimate or Master cutter kit to complete your boxes to a high standard.

STANDARD DELUXE PACKAGE **\$505** [Discounted price]

A jig with **two** templates plus cutters to suit. The popular choice is the A10 and B10 templates. A good starting point for the more adventurous woodworker, covering work on both a small and larger scale.

If you do only small work, choose the A10 and F5 templates for dovetail and finger joints. Consider adding an Ultimate or Master cutter kit to complete your boxes to a high standard.

STANDARD SOLO PACKAGE **\$335**

Start with a Solo package ...it contains the jig body, the template of your choice, appropriate cutters and instruction manual. There are five standard templates—three dovetail: H10, A10, B10, and two finger joint: F5 and F15. You provide dressed and sanded timber and one or two clamps and you're ready to go!

STANDARD UPGRADE KITS **\$199**

To add a template to your Solo package ...purchase a template upgrade pack. No matter what jig package you choose, you can expand the versatility of your jig by purchasing additional standard template upgrades. Each upgrade includes the template of your choice, cutters and a pair of backing boards.

We still manufacture templates for jigs made before March 2006. These templates have five attachments points and screw into the jig body.

STANDARD JIG BODY **\$165**

Consider having each template set up on its own jig body. You'll then have all your templates set up, adjusted and ready to go. A great time saver in a busy workshop! The extruded aluminium block [with **two fixing points** on base] is fully assembled with two [2] stops, backing boards and shims—ready for your template!
